## DARK DIAMOND

### Diamond like feel & precision - LM-ErgoSense DARK DIAMOND

LM-ErgoSense restorative instruments with Dark Diamond non-stick coating are ideal for placing and contouring of composite resins. The diamond like coating reduces the stickiness and allow for pleasant and precise restorative instrumentation.

#### Features:

- Exclusive diamond like coating
- Hard surface
- Smooth surface
- Dark color coating
- LM-ErgoSense handle

#### Benefits:

- Non-stick placement and sculpting of the composite resin
- Not sensitive to scratches
- Easy to clean
- Maximum contrast against the filling & minimal reflections
- Extreme precision and feel

#### Selection for maximum precision:

**Burnisher**  
LM 31-32DD ES

For packing and modeling composite.

**Burnisher-Plugger, ball-ended 1.5-2.5 mm**  
LM 471-473DD ES

For modeling composite.

**Modeller MH**  
LM 708-709DD ES

For packing large approximal fillings. Cylinder shaped working end will not get stuck into the composite while light curing.

**Modeller MH Mini**  
LM 707-708DD ES

For packing small and medium approximal fillings. Cylinder shaped working end will not get stuck into the composite while light curing.

**Packer-Modeller IO**  
LM 482-483DD ES

For packing and modelling composite. Conical working ends optimal for shaping occlusal surfaces.

**Plastic instrument, anterior**  
LM 43-47DD ES

For placing, packing and contouring composite.

**Plastic instrument, posterior**  
LM 48-702DD ES

For placing, packing and contouring composite.

**Mini Spatula**  
LM 444-445DD ES

For placing and contouring composite.

Dark Diamond instruments can be cleaned and sterilized like any other LM instrument.
